

Victoria Afanasyeva

**Ecological & Environmental Protection
Engineer
“NISSAN MANUFACTURING RUS”
LLC.**

Date of birth 04/01/1966
sity Kustanay, Kazakhstan

I finished Sankt-Petersburg technological institute named Lensovet in 1990. Victoria has graduated with specialization in “Automation of production for the chemical plant facilities”. Then I got next professional education as an ecologist at Sankt-Petersburg Forest Academy and Ecological training center. I have an experience like external auditor of Environmental Management system of MS ISO 14001:2004 (Course “Check Point”).

The first working place had become Carburetor plant in St-Petersburg when I started to work in the ecological department which was created there. Knowledge given by the institute was improved with the production activities. My working experience there is about 16 years. I have gone through the way from an intern till the Ecological department manager and it helped her to acquire the skills and an invaluable experience in the field of industrial ecology.

The new important step of the career became the work in the foreign company “NISSAN MANUFACTURING RUS” LLC where I worked since 2008 year. The position is ecological & environmental protection engineer. My activity is connected with the realization of environmental programs in the company such as waste and air emissions reduction, energy consumption reduction, creation of the programs for environmental awareness of employees. For corresponding to the changeable environmental legal requirements my responsibility is controlling the production activities and to communicate with the State supervision organizations.

One of the best results of my activities is the certified Environmental management system in accordance with MS ISO 14001 for the automobile production confirmed every year by the international certification center TÜV Rheinland Group. This year Victoria’s name was included in the encyclopedia “Gold fund of the professionals in the sphere of ecology and the resource-saving of St-Petersburg”.

Allow me to nominate myself for election on the position of a co-chairman of Industrial Committee to continue effective activity for benefit of Association and our company.
