ADDITIONAL:

I am a domain specialist in EC legislation, Risk Assessment for Machinery and Industrial Automation. You can see that my entire career is related to safety. For two years I'm writing the master's thesis on "Human Factor and Risk Assessment in the investigation of accidents with tower and bridge cranes." I see my mission to share my knowledge and ideas with colleges and with community of SPIBA. The main tools are communication and the ability to share experiences between specialists.

P.S. Sorry for my beginners English
